As an Amazon member and affiliate, Retail Egg earns from qualifying purchases. See the source version on businesswire.com: Mathews (andy@nicenetwork.com)Microsoft Corp. (MSFT), one of the world's largest technology companies, was founded in 1975 by Bill Gates and Paul Allen in a garage in Albuquerque, New Mexico. Five years later, Gates and Allen were hired to provide the operating system for IBM's first personal computer, followed in 1985 by Microsoft's release of its now ubiquitous Windows software product. In 1986, the company raised \$61 million in an initial public offering (IPO) that of some analysts referred to as the deal of the year. Although Microsoft started out as a software company, it has expanded its reach to broad areas of the technology industry. Some traditions are very honored to run away, and on Wall Street, the annual top picks are one. Usually done at the end or beginning of a year. Street analysts publish assessments of stocks they believe will show the best performance in the coming months – their top picks. Analysts have analyzed each action carefully, looking at its past and current performance. Its recommendations provide valuable direction for building a resilient portfolio in the new year. With that in mind, we use the tipranks database to identify three stocks that analysts describe as their top picks for 2021. Talos Energy (TALO) The Gulf of Mexico has long been known as one of the world's largest hydrocarbon production regions, and Talos Energy, which produces about 48,000 barrels of oil equivalent per day from offshore operations in the Gulf, is an important player in the area. Talos ended the third quarter of 2020 with a net loss, but revenues of \$135 million increased 53% sequentially. The company reported more than \$353 million in affordable liquidity to end the quarter, including \$32 million in cash in hand and \$321 million in available credit. In December last year, and continuing in January of this year, Talos consolidated its liquidity situation through senior secure note issues. The December issue, from \$500 million to 12%, will be used primarily to pay for a previous note issue that is expected to be delivered next year. The January issue, an additional \$100 million, will be used to cover outstanding debt in the reserve-based lending facility. Both note issues should be delivered in 2026. TALO as its top E& amp;P choice for 2021. Northland analyst Subash Chandra wrote: TALO is one of the few companies we are aware of trading in PDP values without good reason, in our opinion. The company addressed the wall and ease of credit emphasizes with a December stock offering and refi. They enter 2021 with space to cross the finish line with Zama and seek opportunities to line up in GOM. To this end, Chandra classifies TALO as Outperform (i.e. Buy), and places a price target of \$19, indicating the growth potential of 91% in the coming months. (To watch Chandra's history, click here) Overall, with five analyst ratings on file, including 4 Buys and a single Hold, Talos gets a strong buy rating from analysts' consensus. The stock is priced at \$9.96, and its average target of \$14.33 gives ~44% advantage over the year horizon. (See TALO stock analysis in TipRanks) Twilio (TWLO) Next is Twilio, a Silicon Valley cloud communications company. Twilio's software services allow customers to perform their telecommunications services through their office computer servers, providing not only phone calls, but chats, texts and video conversations. The service includes security features, such as user verification. The COVID pandemic, and the shift to remote work that has been applied in the economy, has been a boon to Twilio. The move put a premium on stable and reliable remote and teleoperation connections, and the company's revenues, which were already strong and showing sequential earnings each quarter, rose to \$447 million in 3Q20. Subsequently, Twilio's shares have risen 225% in the last 52 weeks. Oppenheimer analyst Itai Kidron sees the company on a solid foundation for continued growth, writing: While some puts and takes are in place in 1Q21, Twilio's long-term opportunity remains underestimated by investors. We believe that the company's differentiated product portfolio (communications/data) and evolving GTM approach (hiring/GSI) can drive G2K/Int'l adoption/expansion and enable & gt; 30% scale growth (& gt;\$48/\$68) through CY23/24. The 5-star analyst chooses TWLO as a top pick, based on his optimistic analysis of Twilio. This comes with an Outperform rating (i.e. Buy) and a price target of \$550 implying a one-year growth of 41%. (To watch Kidron's history, click here) How does Kidron's high bid weigh against the Street? Wall Street likes Twilio, a clear fact of the 21 analyst ratings on record. No less than 18 of these are Buys, against only 3 Holds. However, recent stock gains have brought the price to \$388.65, leaving room for only a 2% lead before reaching the average price target of \$396.88. (See TWLO stock analysis in TipRanks) SI-Bone (SIBN) Medical technology is an almost infinite field of possibility, and SI-Bone has found a niche. The company specializes in the diagnosis and treatment of pain and dysfunction in the sacroiliac joint between the back and pelvis. The company's revenues fell between 4Q19 and 2Q20, as the crown crisis put a damper on elective medical procedures. This changed in the third quarter, when the economy began to open up, many industries, including the medical field, saw an explosion of pent-up demand that that it hasn't dissipated yet. In raw figures, SIBN reported a sequential revenue increase of 42% in the third quarter, with the top line at \$20.3 million. Compared to the previous year, revenues increased by 26%. During the quarter, the company underwent 50,000 fFuse procedures performed by 2,200 surgeons worldwide. The company had \$132 million in net assets available at the end of the quarter, versus \$39.4 million in long-term debt. Looking ahead, the company is looking to gain 8% to 10% in full-year revenue for 2020, expecting the top line to be \$73 million to \$74 million. Analyst David Saxon, who covers Nectech's stock, says: SIBN has shown resilience during the pandemic, and we believe its growth drivers can allow it to outperform consensus revenue throughout 2021. In addition, we expect the expansion of SIBN's sales force in 2021, the construction momentum in surgeon training, upcoming product launches, and direct patient marketing to contribute to strong revenue in the coming years. Saxon uses these points to support his top pick status for the SIBN. Its average price target is \$35, suggesting a 23% increase, and fitting in well with your buy rating. (To watch Saxon's history, click here) In a sense, SI-Bone receives a Strong Buy from Wall Street, and is unanimous – based on 5 positive reviews. The stock is selling for \$28.48, and its average target of \$33.80 implies room for growth of ~19% over 2021. (See SIBN stock analysis in TipRanks) To find good ideas for stocks traded at attractive valuations, visit TipRanks' Best Stocks to Buy, a newly launched tool that unites all of TipRanks' stock insights. (Bloomberg) -- Stellantis NV, the automaker formed from the merger of Fiat Chrysler Automobiles NV and PSA Group, won its first day of trading after completing a more than two-year effort to form one of the world's largest vehicle manufacturers. Shares rose as much as 7.7% in Milan, where the STLA ticker replaced the Fiat Chrysler symbol. The shares also gained in Paris, where the company listed in place of Peugeot SA. The debuts are the culmination of negotiations initiated by psa's then ceo, Carlos Tavares, with his counterpart at Fiat Chrysler at the end of 2019. The 62-year-old will lead an autonomous unit with about 100,000 employees and 14 brands in an uncertain future, where cars increasingly flee batteries and software and the combustion engine finds its end. Read: A CEO of Auto Makers Knows What's Next Over a New EmpireFiat Chrysler and PSA were worth a combined 39.4 billion euros (\$47.6 billion) at the close of trading last week, a fraction of the \$783 billion market capitalization of Tesla Inc., the world's most valuable automaker. What Bloomberg Intelligence says Stellantis faces a mixed outlook, as U.S. stimulus plans could boost Chrysler vs. a more uncertain outlook for Peugeot in Europe. Former PSA CEO Carlos Tavares takes over and, similar to his management of PSA's acquisition of Opel in 2017, we anticipate a new strategy in the first 100 days of his administration. All regions face a difficult 1H amid continuous blockages. ↳- Michael Dean, automotive analyst at BI, Click here to read the Fiat report and PSA has estimated that it will save about 5 billion euros per year, converging vehicles and powertrains, joining parts and integrating sales and marketing functions. You can rely on our management on our ability to execute, execute, said Monday during a bid opening ceremony. We're here to do the job. John Elkann, leader of the billionaire Agnelli family and president of Stellantis, was here for years with the late former CEO Sergio Marchionne one of the most outspoken proponents of consolidation for the auto industry, as its manufacturers spend billions on electrification and autonomous driving technology. We have the scale, resources, diversity and know-how to successfully capture the opportunities of this new era in transportation, he said. Bloomberg reported this weekend on the boom that is taking shape in commodity markets. What happened: Investors are moving from the stock market to more distant areas in search of returns in a very low interest rate environment. What's next: China has started to diversify away from copper to other commodities. Bloomberg reports: The story points to several developments: * Morgan Chase Bank and Co. (NYSE: JPM) recommending a change from buys to marketable equity fund bets at their highest level in a decade totaling nearly \$120 billion * Agricultural markets have gained more than 30% in the last decade * Corn at a seven-year high * Soybeans and wheat at the highest prices since 2014 * Copper with the potential to rise 20% to more than \$10,000 per metric ton, according to Francisco Blanco, head of global commodity research at Bank of AmericaQuick Ways To Jump In: If makes you itch to get on the action, then here are three ETFs and two copper backgrounds that can give you exposure to metals and agriculture, which we've gathered by asking Benzinga people some quick ways to place bets. Note that this is by no means a comprehensive list, but a few simple ways to buy if you believe that these goods will continue their ascent. * Invesco DB Agricultural Fund (NYSE: DBA) With \$691.8 million in assets under management, this is one of the largest ETFs that holds real agricultural commodities. Its 26-week rate of return is 20.79%, according to the ETF Database. The stock price has risen 20.79% in the last six months and closed last week at \$16.56. * For an ETF that holds agricultural stocks, the largest is the VanEck Vectors Agribusiness ETF (NYSE: MOO). He has \$914.5 million in assets under management and the best ticker symbol out there, says Spencer Israel, producer of Benzinga's PreMarket Prep. It has a 26-week rate of return of 31.32%, according to the ETF Database. Up 29.89% last six months and closed last week at \$82.14. * The VanEck Vectors Rare Earth/Strategic Metals ETF (NYSE: REMX) holds shares in that produce rare earth metals such as titanium, molybdenum, cerium, manganese and tungsten. It has \$421.1 million in assets under management. The ETF's 26-week rate of return is 89.57%, and the share price closed last week at \$72.38, an increase of 87.90% in six months. * For pure copper parts, also look for the Barclays iPath Bloomberg Copper Subindex (NYSEARCA: JJC), which is a stock exchange-traded note, and the United States Copper Index Fund (NYSE: CPER), a stock exchange-traded product. Benzinga does not provide investment advice. All rights reserved. The Dow Jones Industrial Average rose & amp; P 500 index rose 0.7% and 0.3%, respectively, so far this year. Most financial markets will be closed for the celebration of the civil rights leader's life, the first since protests over The Death of George Floyd touched on massive protests across the country. Lakshidiusus tookonot sinan hakamenen vo olla kamattavampaa kuin kokkosen emmin. Edulliset hinnat ovat voimassa vuoden loppuun asti. With 8.6% interest on their savings accounts, the crypto fintech platform BlockFi is offering an interesting option for savers disappointed with low rates. Blackberry Limited (BB) is a puzzle in the investment world, full of great promise, but at the same time disappointed shareholders several times. The company is armed with a huge portfolio of patents, and offers several cutting-edge products in cybersecurity, Internet-of-Things (IoT) and automotive technology. In addition, shares have risen 32% in the past two sessions after BlackBerry announced it has held 90 smartphone technology patents to Huawei as part of its move away from the mobile phone space. But while BlackBerry spurs with potential, it also disappoints quarter after quarter. In the most recent quarter, BlackBerry lost revenue and GAAP EPS. Most worrying was the drop in revenue, down 20% from a year earlier, and the considerable increase in GAAP operating loss of \$127 million, up from a loss of \$29 million a year ago. To be fair, some of the performance problems were related to the pandemic, particularly with regard to the automotive sector, where factory outages have resulted in fewer car deliveries and therefore lower QNX licensing fees. However, the company's revenue has been shrinking for several years before the pandemic. The five-year growth rate, for example, is -20.8%. Company Transformation The story is not so bad. Glimmers of hope are emerging in what is still shaping up to be a multi-year turnaround story that began in 2013, the year John Chen took over the reigns of BlackBerry as CEO. At that time, BlackBerry was a \$6 billion ITanitic, immersed in red paint after hitting an iceberg iceberg the Apple iPhone. After taking over, John Chen went on to monetize the company's patent portfolio, and turn the mobile phone maker into a much more modest \$1 billion software company. The transformation took place over several years, with half a dozen acquisitions along the way, including Cylance, Good and Atrio. These companies were assimilated and worked on BlackBerry product flows, but also resulted in a significant reduction in goodwill, including \$500 million in early 2020. BlackBerry at least stabilized its financial situation, and now has positive free cash flow and adjusted EBITDA. That said, the turbulence around its company affected its stock price and resulted in an attractive valuation. BlackBerry also has some promising technologies that could lead to strong revenue growth in the future. This year may be a great time to invest in BlackBerry. Valuation Metrics The low valuation of the BlackBerry should not be surprising given its past problems. The company has superior metrics over the software industry on several fronts, summarized in the table below. MetricBlackBerry/IndustryPrice/Sales Ratio0.5511.31Price/Book Ratio0.0711.44Gross Margin74.2%70.0% Operating Margin -9.2%23.6%Current Ratio2.271.57 Total Debt/Equity0.330.55 Metrics such as price/sale and price/book ratio suggest that BlackBerry is heavily devalued, with a strong probability that the shares will surpass the future potential of the company when the future potential of the company is recognized by the market. It is not at all unreasonable to expect a 2x - 3x rise in stock price from its current level. BlackBerry IVY BlackBerry's recent announcement about its strategic alliance with Amazon Web Services (AWS) may be enough to boost the company's stock price. The unique partnership provides instant credibility along with a 'Big Data' mindset to vehicle data, resulting in unlimited potential for third-party applications in areas such as car insurance, maintenance, EV charging and connected vehicles. The AWS platform offers BlackBerry IVY cloud connectivity, scalability, and a global reach. This initiative will provide BlackBerry with a new source of recurring revenue in the automotive market, where it already has software installed in more than 175 million cars. Spark Suite In addition to BlackBerry IVY, there are several other promising technologies emerging from BlackBerry, including Spark Suite, which combines Endpoint Management with Endpoint Security, a logical step in the evolution of mobile devices. Spark Suite provides Zero Trust, an emerging concept in cybersecurity that is becoming a necessity for businesses as mobile devices like wearables become the norm within the workplace. In addition to IVY and Spark Suite, BlackBerry has several other product offerings including QNX, BlackBerry AIOhc and BlackBerry SecuSUITE. While not as exciting as BlackBerry's recent initiatives, they provide a steady and growing revenue stream. Wall Walk Take From Wall Street analysts, BlackBerry gains a consensus of analyst hold based on 3 Hold ratings. In addition, the average price target of \$8 puts the potential for disadvantage at 18.7%. (See analysis of BlackBerry stock in TipRanks) Summaries and Conclusions BlackBerry has had a turbulent past, reducing from a \$6 billion hardware company to a \$1 billion software company over the past seven years. Revenue fell 20% over the last quarter, but much of the poor performance can be attributed to the soft automotive sector resulting from the pandemic. QNX's licensing fees and royalties will increase as the global economy improves. Despite several years of disappointing results, the company has stabilized its financial situation and appears to be positioned to capitalize on several cutting-edge technology ventures, including its exclusive partnership with AWS and management and security of corporate mobility. Given the very low valuation, this may be the ideal time to invest in BlackBerry. Disclaimer: The information contained herein is for informational purposes only. Nothing in this article should be taken as a solicitation to buy or sell securities. Thanks to the increasing number of SPACs and their media coverage, Chamath Palihapitiya has become a household name around the world. Now, he's asking people what else he can offer them for investment choices. What happened: Palihapitiya took to Twitter to ask his 730,000 followers if they would like new investment offers with access to all their investments. Palihapitiya's tweet offered four options in the poll titled What You Want. The options were " SocialCapital ETF * SC HoldCo (A de la SBRK) * SC Venture Syndicate * Nothing-*** off... The social capital ETF was the overwhelming favorite, getting 47.2% of the votes of more than 76,000 people who participated in the survey. SC HoldCo, which would operate similar to Berkshire Hathaway Inc (NYSE: BRK-A) (NYSE: BRK-B) and would likely trade as a stock, came in second with 13.4%. Palihapitiya was compared with Warren Buffett of this generation. What's next: Palihapitiya has already sinned to offer an ETF before, and the search results could bring the legendary investor closer to making this a reality given the interest. His Hodosophia of Social Capital was founded as a concept called IPO 2.0 to provide an alternative path way for traditional IPOs for innovative technology companies to become public. Palihapitiya aims to bring public spacs with symbols running from IPOA to IPOZD. My ambition is to be the Berkshire Hathaway of our generation. It will be a holding company that, instead of keeping Gillette and Coca-Cola and McDonald's, will maintain technology business. Palihapitiya told Fortune last year. Palihapitiya invests \$100 million of its own personal money in the business; it makes to skin in the game. With Palihapitiya SPACs trading with prizes before the announced offerings, a holding or ETF that offers access to all SPACs could see strong Link: 5 things you may not know about Chamath PalihapitiyaPotential Holdings: A share holding company or Chamath ETF would include SPACs from Social Capital Hodosophia and also companies that Palihapitiya supported as a member of PIPE. Social Capital launched six SPACs, with three of them completing deals, one pending and two without targets. Virgin Galactic Holdings (NYSE: SPCF), OpenRoad Technologies (NASDAQ: OPEN) and Clover Health Investments (NASDAQ: CLOV) completed the Mergers of SPAC. Share Capital Hodosophia Holdings Corp V (NYSE: IPOE) is taking the public SoFi. Share Capital Hodosophia Holdings Corp IV (NYSE: IPOD) and Social Capital Hodosophia Holdings Corp VI (NYSE: IPOF) are looking for targets. The SPACs in which Palihapitiya has been involved as a member of a PIPE include MP Materials (NYSE: MP), Desktop Metal (NYSE: DM), Insu Acquisition Corp II (NASDAQ: INAC) and ArcLight Clean Transition Corp. (NASDAQ: ACTC), which recently announced an merger with investment offering a basket of shares and SPACs could also include palihapitiya companies it is a fan of, which include Amazon.com, Inc. (NASDAQ : AMZN), Slack Technologies Inc (NYSE: WORK) and Tesla Inc (NASDAQ: TSLA). Disclosure: Author is long actions IPOD, SPCF. (Bloomberg) -- The U.S. government has notified several Huawei Technologies Co. suppliers that it is revoking its licenses to work with the Chinese company and rejecting other requests in the final days of Donald Trump's presidency. Reuters reported, citing unidentified people familiar with the matter. Current licensed vendors that have been notified include Intel Corp., Reuters said. In addition, the Commerce Department has indicated its intention to deny a significant number of export license applications to Huawei, according to an email obtained by the news agency. Representatives for Intel and the U.S. Department of Commerce did not immediately respond to Requests from Bloomberg News for comment. Suppliers include Intel, which has a long history of working with Huawei. Intel's CEO, Brian Krzanich, said in a statement on Friday that Intel will continue to work with Huawei. Intel's CEO, Brian Krzanich, said in a statement on Friday that Intel will continue to work with Huawei. Intel was among a small group of companies that the U.S. government has released to do business with Huawei, which placed it on its so-called list of national security threats in May 2019. The Trump administration's sanctions have cut Huawei from critical business relationships with people like Alphabet Inc.'s Google, which supplied Android software on hundreds of millions of Huawei smartphones, and Taiwan Semiconductor Manufacturing Co. for your cutting-edge chips. Huawei has relied much less on Intel, especially for its servers and consumer laptop products. A representative of the Chinese company did not respond request for comment. Read more: China Inc. Attack Trump leaves important decisions for BidenTrump has stepped up his campaign to curb China's technological rise as his mandate nears its end. Xiaomi Corp., another smartphone and Electronics supplier, was among nine companies added to the U.S. Department of Defense's list of companies with alleged ties to the Chinese military, a move that will restrict U.S. investments in their bonds. Other companies include China's state-owned aircraft manufacturer Commercial Aircraft Corp. Ltd., or Comac, which is central to China's goal of creating a narrow-body aircraft that can compete with Boeing Co. and Airbus SE. The profile of the target companies, including in Thursday's latest announcements, is impressive. They include China's three largest telecommunications companies, its leading chip maker, its largest social media and gaming players, its two major smartphone manufacturers, its main deepwater energy explorer, its main military aerospace contractor, its main drone manufacturer and its leading commercial aircraft manufacturer. While the scope of Trump's unprecedented actions has shaken markets, the full reckoning of its impact depends largely on President-elect Joe Biden. Your administration will have the power to keep the restrictions in place, remove them or squeeze them further. ASIC devices primarily used to mine bitcoin are said to have consumed 95 megawatts per hour electricity at a reduced rate. CNBC's latest Mad Money Lightning Round. Jim Cramer said, American Airlines Group Inc (NASDAQ: AAL) went up too much. Instead, I would buy Boeing Co (NYSE: BA). Cramer prefers Crown Castle International Corp. (NYSE: CCI) instead of American Tower Corp. (NYSE: AMT). The day for Opko Health Inc. (NASDAQ: OPK) isn't coming, at least not anytime soon, thinks Cramer. General Motors Company (NYSE: GM) might be worth a lot more, Cramer said, adding that it's pretty good – though it's not the next Tesla Inc (NASDAQ: TSLA). If you want a speculative action, Surface Oncology Inc (NASDAQ: SURF) is a notable company, Cramer said.
